

Annual Activity Report (2025–2026)

Department of Statistics

During the academic year **2025–26**, the Department of Statistics actively engaged in activities aimed at creating awareness about the scope and opportunities in the field of Statistics.

A Career Guidance and Higher Studies Discussion Programme was organized in various days in August for the M. Sc. and B. Sc. Mathematics students of K. K. T. M. Government College, Pullut. The programme focused on introducing students to the diverse career opportunities available for graduates with statistical knowledge and quantitative skills. The discussion highlighted the growing demand for statisticians and data analysts in sectors such as government services, banking, insurance, healthcare, research organizations, information technology, data science, business analytics, and official statistics.

The session also provided detailed information on higher education opportunities after graduation, including M.Sc. Statistics, Data Science, Actuarial Science, Operations Research, Biostatistics, Econometrics, and interdisciplinary programmes offered by reputed universities and institutions across India. Participants were informed about competitive examinations, scholarships, career prospects, and emerging trends in statistical education and research.

The interactive programme enabled students to clarify their doubts regarding academic pathways, entrance examinations, and employment opportunities. The initiative was well received by the participants and successfully enhanced their awareness of the significance of Statistics in higher education, research, and industry.
